Summary

Information Systems graduate with hands-on experience in backend development using JavaScript, Node.js, Express.js, and relational databases. Experienced in developing RESTful APIs, implementing CRUD operations, request validation, middleware, and error handling, as well as testing APIs using Postman. Familiar with frontend development using React and integrating frontend applications with backend services.

Skills

- Backend Development: Node.js, Express.js, RESTful API, CRUD, Middleware, Error Handling
- Frontend Development: React, Vite, Tailwind, HTML, CSS
- API Development & Testing: API Design, Request Validation, Postman, API Testing
- Database & Data Management: PostgreSQL, MySQL, SQL
- Tools/Software: Git, GitHub, Visual Studio Code, Debugging, Environment Configuration
- Languages: English (Intermediate), Indonesia (Native)

Experience

Information Systems Laboratory, Universitas Gunadarma Depok, Indonesia
Laboratory Instructor Sep 2024 – Aug 2025

- Conducted approximately 20 laboratory sessions per month for classes of 30 – 40 students.
- Prepared programming exercises, practicum materials, and evaluation activities while ensuring laboratory sessions ran effectively.
- Guided students through debugging, troubleshooting, and problem-solving, helping identify programming errors and develop appropriate solutions.

Projects

Asah by Dicoding in Collaboration with Accenture Jakarta, Indonesia
Front-End Developer | LearnCheck Capstone Project Nov 2025 – Jan 2026

- Contributed to the development of LearnCheck, a web application built using React, Vite, and Tailwind CSS.
- Integrated frontend components with RESTful APIs to support client-server communication and data handling.
- Applied asynchronous JavaScript and Git/GitHub workflows during collaborative project development.

Dicoding Program Project Jakarta, Indonesia
Back-End Developer | OpenMusic API Sept 2025 – Oct 2025

- Developed a RESTful API using Node.js and Express.js for the OpenMusic application.
- Integrated Redis caching to improve API data retrieval efficiency.
- Implemented RabbitMQ as a message broker and developed a consumer service for asynchronous message processing.
- Configured application environment variables to support database and messaging service connections.

Personal Project Jakarta, Indonesia

Full-Stack Developer | Expense Management System Sept 2026 – Oct 2026

- Developed a personal finance management application using React, JavaScript, Node.js, Express.js, and PostgreSQL.
- Designed and implemented RESTful API endpoints for transaction, category, and budget management.
- Implemented JWT-based authentication, request validation, and business rules to support secure and consistent transaction processing.
- Integrated the React frontend with backend APIs and tested endpoint behavior using Postman.

Education

Gunadarma University Depok, Indonesia

Bachelor of Information Systems | GPA 3.84/4.00 Sep 2022 – Aug 2026

- Relevant Coursework: Fundamental Web, Fundamental DBMS, Golang
- Research Project: Implementation of Multiple Linear Regression in a Web-Based Laptop Price Prediction Application
- Thesis: Outpatient Implementation of the Prophet Algorithm for Developing an Outpatient Visit Forecasting Application at Aulia General Hospital

Certifications

ASAH by Dicoding in Collaboration with Accenture

- React & Back-End with AI 14 January 2026

Lepkom Gunadarma

- Fundamental Web 5 July 2023
- Fundamental DBMS 26 October 2023
- Golang 21 July 2025
