PROFESSIONAL SUMMARY

Information Systems graduate with hands-on experience in Front-End Development, Back-End Development, and Machine Learning through academic and personal projects. Experienced in developing web applications, building back-end functionality and data processing workflows, and implementing machine learning models for data analysis and time series forecasting. Familiar with Python, JavaScript, HTML, CSS, SQL, and Git, with a strong interest in developing data-driven and user-focused applications. Analytical, adaptable, and eager to apply technical skills to real-world projects.

EDUCATION

Gunadarma University — Depok, Indonesia
Bachelor of Information Systems | 2022–2026
GPA: 3.84/4.00

Relevant Coursework: Web Development, Database Management, Data Analytics, Machine Learning, Statistics, Business Intelligence

EXPERIENCE

Laboratory Assistant & Instructor — Gunadarma University
Depok, Indonesia | [2024 - 2025]

- Prepared practicum rooms and equipment to ensure the smooth conduct of teaching and learning activities.
- Facilitated laboratory sessions by explaining course materials and assisting students in resolving issues encountered during practical activities.
- Developed evaluation materials and conducted student assessments to measure learning outcomes.
- Systematically organized and maintained academic administrative data and practicum documentation.
- Collaborated with the laboratory management team to support effective learning activities and achieve optimal learning outcomes.

ASAH Accenture by Dicoding

Participant | [2025 - 2026]

- Participated in a structured technology development program focused on strengthening technical and professional skills.
- Completed project-based learning activities and technical assignments through Dicoding.
- Developed and improved practical skills in software development and technology-related areas through hands-on projects.
- Collaborated and learned through a structured learning environment involving technical and professional development.

PROJECTS

LearnCheck!

Capstone Project | Front-End Developer | 2025

- Developed the front-end interface for LearnCheck, an automated formative assessment feature integrated into the Dicoding LMS via iFrame.
- Built responsive and reusable UI components using React and TailwindCSS to deliver a seamless learning experience across devices.

- Integrated the frontend with an AI-powered backend that generates assessment questions based on sub-module learning materials.
- Implemented LocalStorage to persist students' assessment progress locally in the browser without requiring repeated authentication.
- Optimized the application for embedability and responsiveness, enabling easy integration into the existing LMS ecosystem.

Outpatient Visit Forecasting System

Undergraduate Thesis Project | 2026

- Developed a time-series forecasting application using Python, Prophet, and Streamlit to forecast daily outpatient visits across polyclinics.
- Processed and transformed approximately 97,000 outpatient visit records into structured daily time-series data.
- Implemented time-based train, validation, and test splits and Grid Search for Prophet hyperparameter tuning.
- Compared Prophet with multiple baseline models and evaluated forecasting performance using MAE, RMSE, WAPE, sMAPE, and Bias.
- Built a modular Streamlit dashboard with separate forecasting, historical data, and evaluation pages, supported by stored model artifacts and automated tests.

OpenMusic API

Back-End Development Project | 2025

- Developed a RESTful API using Node.js and Express for an OpenMusic application.
- Implemented back-end functionality for managing application resources and handling API requests.
- Applied server-side routing and API architecture to support structured communication between clients and the application.
- Practiced back-end development concepts including API design, request handling, and application structure.

Laptop Price Prediction

Machine Learning Project | 2025

- Developed a machine learning application in Python to predict laptop prices based on product specifications.
- Prepared laptop specification data and implemented a predictive model for estimating laptop prices.
- Integrated the trained model into an application using a serialized model artifact and supporting dataset.

CERTIFICATIONS

- **BNSP Certification**
Badan Nasional Sertifikasi Profesi
[Junior Web Programming] | [2026]
- **ASAH Accenture by Dicoding**
Participant | [2025 - 2026]

ADDITIONAL INFORMATION

Languages: Indonesian (Native), English (Intermediate)

Interests: Data Analytics, Front End Development Back End Development
